Questions on skin biology video 4

- Q1 Why do you think nettles induce the rash of urticaria?
- Q2 Urticaria is itchy. Can you see any value in humans developing urticarial response in response to exogenous attack (such as from nettles?)
- Q3 Mast cells are found just in skin? True or false
- Q4 What are the three components of the triple response?
- Q5 What type of histamine receptors are involved in the triple response?
- Q6 How do we know that non-histamine mediators are important in urticaria?
- Q7 Is solar urticaria just due to UVR, or can visible light be involved?
- Q8 Some patients develop urticaria when they take opioids. Why?
- Q9 Is IgE essential to the mechanism of all types of urticaria?
- Q10 Name two types of physical urticaria
- Q11 What the implications of solar urticaria being transmissible?
